Đỗ Thế Dương

Senior Backend Software Engineer

Phone: (+84) 796 513 527 | Email: duongdt011099@gmail.com | GitHub: duongdt011099

PROFESSIONAL SUMMARY

Senior Backend Software Engineer with 5 years of experience designing, building and supporting web APIs, microservices and data-driven applications on the .NET (C#) stack. Strong foundation in object-oriented analysis and design, design patterns and database design, with hands-on experience in AWS, Azure and container-based deployment. Delivered work across multiple client projects, from production support and feature development to solution architecture. Consistently performs code reviews and mentors teammates to keep quality high across the team.

TECHNICAL SKILLS

Backend	C#, .NET, ASP.NET (REST API, MVC), Entity Framework, Dapper, Microservices, Modular Monolith
Frontend	React, Angular, TypeScript, JavaScript, HTML5, CSS3, jQuery
Desktop	WPF (Avalonia UI), Windows Forms
Databases	SQL Server, MySQL, MongoDB, Redis, Power BI
Cloud & DevOps	AWS (Lambda, Pinpoint), Azure, Docker, Kubernetes, Linux
Engineering	OOP/OOAD, Design Patterns, Database Design, Code Review, Mentoring, Agile, Waterfall
Tools	Git, SVN
Languages	English (Upper-Intermediate)

PROFESSIONAL EXPERIENCE

Company	Project	Responsibility	Position / Role
KMS Technology Vietnam Jul 2021 – Present	**iPipeline** Node.js, AWS	• Develop new backend and frontend features in Node.js, working in a cloud-based AWS environment.	Senior Software Engineer
	UltraRAD ASP.NET REST API, React	• Develop backend web services for a modular monolith system, keeping module boundaries clear and loosely coupled.	Senior Software Engineer
	Ripple Operations Design phase, .NET architecture	• Researched and proposed the .NET solution architecture together with the team during the design phase.	Senior Software Engineer
	Attindas ASP.NET REST API, React, Microservices	• Developed new API endpoints and built a new service within an existing microservices system.	Middle Software Engineer
	Omnicia WPF, Avalonia UI	• Built a desktop application using WPF with Avalonia UI as the UI/UX framework.	Middle Software Engineer

Company	Project	Responsibility	Position / Role
	Valant ASP.NET, Angular, AWS	• Built APIs for an existing application and developed new Angular screens. • Used AWS services (Pinpoint, Lambda) to implement an automated call center solution.	Middle Software Engineer
	Deerfield Agency Power BI, Azure Data Studio, React	• Created Power BI reports with Azure Data Studio as the main data tool. • Developed a web application using React.	Junior Software Engineer
	Clearwave (Allscripts) ASP.NET REST API	• Developed new features and built a proxy and APIs for the existing system.	Junior Software Engineer
	Sims Classic ASP.NET MVC	• Fixed defects, improved code quality and provided customer support in the production environment.	Junior Software Engineer
FPT Software Jan 2020 – May 2020	**Tohogas** AngularJS, Java	• Migrated an application from Flex/Flash to the Angular framework, developed features and fixed bugs.	Junior Software Engineer

PERSONAL PROJECTS

Multi-Class Race Dashboard | Blazor Server, .NET, EF Core, SQLite

- Desktop application for managing racing championships, seaons, drivers in Assetto Corsa game.

Family Business Product Management System | ASP.NET, C#

- Designed, built and continuously maintain a web-based product management system for my family clothing business, applying new technologies as I learn them.

EDUCATION

FPT University 2017 – 2021

- Major in Software Engineering. Team Leader of the Capstone Project.

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate (AZ-204)
